# Mostbet Aviator: Play the Aviator Crash Game in Rupees

> Mostbet Aviator is how many players in India search for Aviator, the Spribe crash game that Mostbet and many other casinos carry in their lobbies. You stake rupees on the coming round, the multiplier starts at 1.00x as the plane leaves the ground, and the money is yours only if you tap Cash Out while it is still in the air. Every lobby runs the same round: two bets, auto cash-out and a published return of 97%.

The full guide, a free practice round and the bonus: **mostbet-aviator.app**

Real Aviator screen on a tablet: the plane climbing at 1.68x over a blue field, a ₹200 bet showing Cash Out 336.00 INR next to a second ₹10 panel

## How one round works

1. Bet in the waiting bar. Between rounds a bar runs for about five seconds. Set a stake with − and + or tap a chip (100, 200, 500 or 1,000) and press Bet.
2. Ride the climb. As the plane gains height, the number in the middle grows, and your button goes orange with a live sum on it: Cash Out 654.00 at 3.27x on a ₹200 stake.
3. Cash out. Tap it and stake × multiplier lands in your balance at that instant.
4. Or lose the stake. When the plane flies away, "Flew away!" lights up in red and every bet still riding is gone.

## At a glance

| Multiplier | Cash Out button shows | If you tapped then |
|---|---|---|
| 1.02x | ₹204 | +₹4 |
| 1.21x | ₹242 | +₹42 |
| 1.68x | ₹336 | +₹136 |
| 1.99x | ₹398 | +₹198 |
| 3.27x | ₹654 | +₹454 |
| 4.56x | ₹912 | +₹712 |
| Flew away at 4.84x | — | −₹200 |

## Questions people ask

**Can I try Mostbet Aviator for free first?** Yes, on this page. Our practice round plays the whole loop: the waiting bar, two panels with Bet and Auto tabs, the chips, the Cash Out button counting up, "Flew away!" and a history strip that fills after each round. You start with 3,000 practice credits; nothing is staked and nothing pays out.

**What do the two bet panels and the Auto tab change?** Under the field there are two panels, and each keeps a separate amount and a separate exit. Many players put the bigger amount on a quick exit and let a small second bet chase a long flight. Open Auto on a panel, type a multiplier, and that panel settles on its own as soon as the round touches it.

**Is there a bonus for Aviator at the partner casino?** Yes, a welcome pack in three parts. Your first deposit gets 500% up to ₹1 lakh , wagered x60 on sports and casino in four instalments. A ₹50 free bet comes with it, and ten Aviator free spins land in the account without a click, paying out at most ₹100. You do not type a promo code: switch the deposit match on in the bonus section before you pay. The Aviator bonus page takes the three parts in order.

**What can the demo teach you, and what not?** The useful lesson is the first column. Twenty practice rounds are enough to stop pressing Bet a fraction too late, and to see that a 3x target leaves you empty-handed in two rounds out of three.

**What is the same with real rupees, and what changes?** The round itself carries over unchanged. What changes is the money, and with it the need for a limit you set before the first rupee bet, not after a loss.

**What is Aviator fun mode?** Fun mode is what many casino lobbies call the demo: the same game opened with play money instead of your balance. In the lobby we recorded, the switch sat at the top of the game as a FUN MODE label. It is the studio's own round, so it shows the real screen; our demo shows our model of it, which is why this page can run before you have an account anywhere.
